

## Solar-Log WEB Enerest™

For users already registered there will be some changes after the Solar-Log WEB Enerest™ update.

At the top on the right you can login with your access data you already have from the Solar-Log™ „Classic 2nd Edition“. After the login, you see the bulletin board of your account.

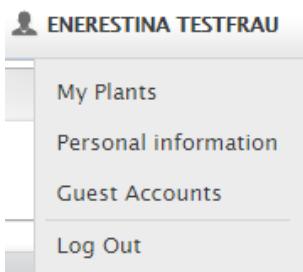

The screenshot shows the Solar-Log WEB Enerest interface. At the top, there's a header with the Solar-Log logo, language selection (ENGLISH), support links (SUPPORT, FAQ), and a user profile (ENERESTINA TESTFRAU). On the left, a sidebar menu includes 'Enerestina Testfrau' (selected), 'Home', and 'Enerest Paketvergleich'. The main content area is titled 'Welcome Enerestina Testfrau'. It displays two sections: 'Plant with L' and 'Second Plant'. Each section features a thumbnail image of solar panels, location details (DE - 72351 Binsdorf), power specifications (DC 15 kWp / AC 10 kVA), and orientation (Chint-Mod). Below these details are two small graphs: a yellow one for 'Yesterday' and a white one for 'Today'. The 'Plant with L' section also lists 'Name,Name', '1', '30°, 45°, 6°, 180°, 200°', and '23:08:17'. The 'Second Plant' section lists 'Name', '1', '40°, 48°, 5°, 150°, 190°', and '23/03/17'. The bottom of the page has a footer with the Solar-Log logo and the text 'www.solar-log.com'.

On the bulletin board you get a short overview about all plants. On the left, you can navigate through the detailed views of your plants. This consists of, in the M package, the data sheet, graphic module and event log. If you have a plant with an active L package you receive, among other things, a plant dashboard, a yield overview and a fully automatic reporting.

You can find a complete overview about the packages on our website: [www.solar-log.com](http://www.solar-log.com).

## Solar-Log™ Account

New users have to register themselves and get a notification mail with a confirmation link in order to activate the account.

Via the Account at the upper right, it's possible to change your personal data, add plants and configure them, make payments. Additionally, you can set up, read only, guest user accounts for a plant.

In the menu My Plants you can add new plants. These added plants will be shown automatically on the bulletin board and on the navigation bar.

A screenshot of the "My Plants" section. It shows a table with two rows of data. The columns are "Name" and "Package Size (kWp)".

Name	Package Size (kWp)
First Plant	15.00
Second Plant	15.00

A complete description of all functionalities can be found on our homepage  
[www.solar-log.com](http://www.solar-log.com).
